## Nano Burst

**Product Name :** Automatic Aerosol Dispenser Nano Burst

### Features :

Automatic programmable for **30 or 45** days setting. Works on realtime basis.

User have to define the day & time of operation based on the realtime data.

User can define the dispenser working days and hours. Any day / days of the week can be chosen as off days.

The advance feature like **PEAK HOUR PROGRAM** allows the user to make the dispenser dispense additional spray during peak time chosen by the user. The peak hour helps the user to intensify the fragrance burst during the busiest hour of usage in the dispensing area. The user can choose a maximum number of 3 peak hours' events while programming the dispenser.

The unique feature of **SLEEP HOUR** programming allows the dispenser to stop the sprays during the sleep hour selected by the user during the programming. Sleep hour is the time that lean for the usage where the dispenser is installed in between the chosen working hours.

When the dispenser is programmed for 30 or 45 days then a unique feature of **GRACE TIME** allow the dispenser to work an additional day even if the refill is not replaced on 30th day or 45th day. An additional grace day gives the user of relaxation to change the refill at ease without hampering the operation.

Inbuilt **AUTO-OFF** feature allows the dispenser to stop working after completion of grace time. With this feature you save the battery by stopping unnecessary running of dispenser even if the refill is empty.

The **SMART CHIP** feature of the dispenser only allows uniquely coded refill cans manufactured that are compatible with the dispenser. This is an **optional** feature the user can choose before ordering / installing the dispenser

Uniquely designed dispenser suits the various interior designs. Easy to operate. Works with 2 x AA type alkaline battery.

**Volume :** Suits all small refill cans (metered sprays upto 100 ml)

**Model No. :** GR 1018

**Colors :** Available in different wooden finishes.
